Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of Group I, claims 1-18 in the reply filed on 28 October 2005 is acknowledged. Claims 19-42 are withdrawn from consideration.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bourganell, U. S. Patent 3,855,122 in view of Scott et al, U. S. Patent 4,954,143 and Wang et al, U. S. Patent 6,258,272.

Reference to Bourganell teaches casting sulfonated polyaryletherketone membranes (columns 1-2). The membranes are taught to possess the claimed thickness (column 4). Scott et al teaches polyether sulfones that are both sulfonated and not sulfonated using concentrated sulfuric acid and cast into membranes. Wang et

Art Unit: 1713

al teaches rendering sulfonated membranes hydrophilic by incorporation of polyvinyl pyrrolidone (column 2). Motivation is provided, therefore, to one of ordinary skill in the art to produce membranes of the claimed copolymers as taught by Bourganel and make them casting as taught by Scott et al and hydrophilic as taught by Wang et al, since the same sulfonated membranes with their intended use is a constant seen in all the references. Claimed membranes are, therefore, rendered prima facie obvious from the combined teachings of the references cited.
